Abdul Rehman Memon

memonabdulrehman250@gmail.com | +92-316-0532576 | Islamabad, Pakistan

Education

National University of Sciences and Technology (NUST), Islamabad — Sep 2022 – Jun 2026
B.S. in Computer Science · CGPA: 3.93/4.0 · **Ranked 1st of 200** in class

Experience

AI Researcher & Backend Engineer, Alexein AI (Islamabad, on-site) — Aug 2026 – Present
- San Francisco-based startup backed by Stanford PhDs, building persistent AI twins grounded in company knowledge graphs
- AI research and backend engineering across reinforcement learning, agentic AI, memory architectures and digital twins

Software Engineer, Alfabolt (Islamabad, on-site) — Dec 2025 – Aug 2026
- Built the AI pipeline for peakenergy.io, reducing manual work by almost 95%
- Developed claimbrite.com (AI-powered mediation platform): built LangGraph agents and deployed the backend and agents on AWS
- Led development of an internal sales automation tool to streamline lead tracking and outreach
- Built and maintained web scrapers for Wellfound and Y Combinator to extract startup and company data

Full Stack Engineer, BrainBox Automations (Remote) — Apr 2025 – Dec 2025
- Owned client projects end-to-end: architecture, implementation, deployment and production support
- Built AWS infrastructure (EC2, Lambda, S3, DynamoDB, Cognito) and CI/CD pipelines for automated testing and deployment
- Integrated LLM features, Google Ads and Meta Ads APIs, Stripe payments and authentication
- Deployed background workers and scheduled (CRON) jobs, tracking execution state in DynamoDB

Software Engineer (Part-time), Infinity Beyond (Remote) — Nov 2024 – Jan 2025
- Built scalable backend APIs using Flask integrated with AWS cloud services, and implemented Redis caching
- Deployed containerized applications using Docker and managed CI/CD pipelines

Next.js + Django Developer (Part-time), Asteramind (Remote) — Sep 2023 – Oct 2024
- Developed and deployed a complete SaaS application with integrated payment processing
- Integrated third-party APIs and implemented authentication using JWT

Selected Projects

- **Compiler in Go:** lexer, parser, bytecode compiler and virtual machine for a subset of C; supports if/else, switch, functions, loops, arithmetic and multiple data types
- **Redis Clone in Go** (CodeCrafters): Redis server with core commands and data structures, TCP networking, persistence and replication, optimized for concurrent clients
- **LeetCode Clone Backend:** distributed system with WebSocket servers and worker nodes; secure multi-language code execution; Cloudflare R2 storage for test cases

Community Service

Social Welfare Volunteer (100 hours) — 2026
- Installed solar panels and other household appliances, and visited an orphanage

Skills

Frontend: Next.js, React.js, Redux Toolkit, TypeScript, Tailwind CSS, Material-UI, Framer Motion
Backend: Node.js, Express.js, Go, Django REST Framework, Flask, Prisma ORM, WebSockets, REST APIs
Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, DynamoDB, SQS, SES, API Gateway, Cognito), Docker, CI/CD, CDK, Terraform, Vercel
AI/ML: Agentic AI, Memory Architectures, Reinforcement Learning, Digital Twins, LLMs, RAG, LangGraph
Databases: PostgreSQL, MongoDB, MySQL, Redis, Supabase
Languages: Urdu (native), English (fluent), Sindhi (conversational)
